Panels

Stroke Panel

Format and enhance a selected line or object border with various stroke types, widths, and colors.

Fill Panel

Format and enhance a selected object's fill with various fill types, colors, and textures.

Panels (continued)

- **To View a Panel:** Select **Window** from the menu bar and select the panel you want to view.
- **To View More Options:** Click the panel's **Options menu**.
- **To Get Help:** Click the **Help button** for more information on the panel.

Effect Panel

Apply an effect to a selected object, such as glow, shadow, or bevel. Edit the effects to change its properties. Or, create and use a preset collection of pre-formatted effects.

Info Panel

Find specific information for the selected object: size, location, and colors used in the object. Enter exact location coordinates on the canvas or enter the exact height and width of the object in pixels.

Color Mixer Panel

Create a new color or choose to use a different color model in your document.

Swatches Panel

Create a new swatch to create your own color scheme or modify an existing swatch.

Tables Panel

Compile all the colors in an image, or edit colors in the image.

Layers Panel

Add, delete, or edit layers, or insert objects in layers. Use layers to stack and organize objects in the image.

Frames Panel

Create frames for use in animations or behaviors, such as rollover buttons.

History Panel

Undo or redo previous actions, or copy or save selected steps for future use.

Optimize Panel

Optimize the image for the best-looking quality with the fastest download time.

Object Panel

Adjust an object's properties.

Behaviors Panel

Apply animations to an object such as a rollover, swap image, or pop-up menu.

Styles Panel

Apply a predefined style to a selected object or text.

Library Panel

Create and add symbols to the library that you will use repeatedly in the document.

URL Panel

Assign a Web address to text or images. The URL panel stores the address for easy access in the future.
