Palettes

Navigator Palette

Zoom and move around in an image with precision without scrolling or resizing the image window. Drag the Zoom Slider to zoom in or out, and click inside the red square to move around the image.

Info Palette

View specific information for the selected object: size, location, and colors used in the object. Enter exact location coordinates on the canvas or enter exact height and width of the object in pixels.

Color Palette

Create a new color, choose a different color model in the image, or modify a color.

Swatches Palette

Create a new swatch to create your own color scheme, modify an existing swatch, or choose another color from the default color swatch.

Styles Palette

Fill a selected object with a predefined style, or apply styles using drawing tools.

History Palette

Undo or redo previous actions, or create a new image from a previous state or snapshot.

Actions Palette

Play a predefined action, create your own action, or edit or delete an action.

Layers Palette

Add, delete, or edit layers, or insert objects in layers. Use layers to stack objects on top of one another in an organized fashion.

Channels Palette

View individual color channels for the color model used in the image. The thumbnails appear in grayscale, but the image changes to display the selected channel(s).

Paths Palette

Each path in the image appears in this palette. Select a path to edit or view it in the image window.
